

# Lâm Tấn Phú

Full-Stack Developer

+84767743787 | lamtanphu2k4@gmail.com

GitHub | LinkedIn | Tân Bình, HCMC

## SUMMARY

Full-Stack Developer with 2+ years of academic and internship experience building applications in ASP.NET Core, Spring Boot, and React Native. Completed 3 full-cycle projects covering API integration, database design, and third-party service integration. Proficient in Agile/Scrum methodologies, clean architecture patterns, and integrating external services including payment gateways and AI-powered OCR.

## EDUCATION

### FPT University, Ho Chi Minh City

Bachelor of Software Engineering

September 2022 – January 2026

## PROJECT EXPERIENCE

### Mobile Developer – Electric Motorcycle Rental System (Capstone Project)

September 2025 – December 2025

FPT University

- Architected 15+ mobile screens in **React Native** with **TypeScript**, implementing **clean architecture** principles and **atomic design patterns** across 50+ reusable components
- Integrated **FPT AI OCR API** for automated ID verification, replacing manual document entry during user onboarding
- Built real-time mapping features with **Google Maps API** and **Mapbox SDK** for branch search, vehicle tracking, and navigation
- Implemented end-to-end booking system with dynamic pricing calculator, insurance integration, and e-signature capability
- Deployed **real-time GPS tracking** enabling live location sharing between riders and support teams
- Integrated **VNPay** and **ZaloPay** payment gateways with transaction history and automated reconciliation

**Tech Stack:** React Native, TypeScript, Google Maps API, Mapbox SDK, FPT AI OCR, VNPay SDK, ZaloPay SDK

### Full-Stack Developer – Vaccine Appointment System

January 2025 – April 2025

FPT University

- Developed 10+ responsive UI components with **ReactJS** following mobile-first design principles
- Built frontend-backend communication layer using **Axios** with comprehensive error handling and request retry logic
- Engineered **RESTful APIs** in **ASP.NET Core** for appointment scheduling, JWT authentication, and role-based authorization
- Designed normalized **MySQL schema** in third normal form (3NF) with strategic indexing, measurably improving query response time
- Configured **Docker** multi-stage builds and docker-compose orchestration, streamlining the deployment process

**Tech Stack:** ReactJS, ASP.NET Core, Entity Framework Core, MySQL, Docker, JWT, Axios

### Backend Developer – Jewelry Sales System

May 2024 – August 2024

FPT University

- Engineered **RESTful APIs** in **Spring Boot** for product management (CRUD), sales processing, and real-time inventory tracking with input validation
- Developed automated scheduling algorithm based on availability constraints and workload balancing, reducing manual scheduling conflicts
- Designed normalized **MySQL schema** with **Spring Data JPA**
- Collaborated with frontend team to establish API contracts using **OpenAPI/Swagger**, minimizing integration issues

**Tech Stack:** Java, Spring Boot, Spring Data JPA, MySQL, OpenAPI/Swagger

## PROFESSIONAL EXPERIENCE

### Game Developer Intern | AmazingTech Solution & Technology Ltd

August 2024 – December 2024

Ho Chi Minh City

- Developed core gameplay features in **Unity** and **C#** applying **OOP patterns** and **SOLID principles**, delivering 2+ features per sprint
- Collaborated in a 5-person **Agile/Scrum** team conducting daily standups, sprint planning, and code reviews
- Implemented **Git** feature branching workflow and merge protocols across the team

## TECHNICAL SKILLS

| Category       | Technologies                                                  |
|----------------|---------------------------------------------------------------|
| Languages      | TypeScript, JavaScript, C#, Java, SQL                         |
| Frontend       | React Native, ReactJS, HTML5, CSS3, Tailwind CSS              |
| Backend        | ASP.NET Core, Spring Boot, Node.js                            |
| Databases      | MySQL, PostgreSQL                                             |
| DevOps & Tools | Git/GitHub, Docker, Postman, RESTful APIs                     |
| Architecture   | Clean Architecture, SOLID Principles, Atomic Design, MVC/MVVM |

## CERTIFICATIONS

- Java Enterprise Edition** – LearnQuest (2024)
- UX Research and Design** – University of Michigan (2024)
- Software Development Lifecycle** – University of Minnesota (2024)

## LANGUAGES

- Vietnamese:** Native
- English:** Professional Working Proficiency (IELTS 7.0)
